DETAILED ACTION II

1. This action is in response to applicant's amendment received on March 12, 1999 and filed as Paper No.5. The examiner also acknowledges that the preliminary amendment has been received, entered and considered in the last office action.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "housing" and the "means for coupling said housing", the "open top" of the housing ; means for biasing the receptacle unit, locking means, "means for partially covering gap", the "brush", the "screen", and the covering means mounted to the top of the receptacle unit and being carried by the receptacle unit as it is being displaced, *these features must be shown or the feature(s) cancelled from the claim(s)*.

No new matter should be entered.

3. The drawings are also objected to under 37 CFR 1.83(b) because they are incomplete. 37

CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

Correction is required.

Claim Rejections - 35 USC § 112

4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Regarding claims 1-19, the word "substantially" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "substantially"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1,2,6 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Byrne 4,747,788. Byrne discloses a substantially planar retractable receptacle 150 with sidewalls (front side of box 152) adapted to be mounted in an opening in a top surface of an article of furniture 104, a gap 168, biasing means 180, and locking means 182.

Art Unit: 2833

8. Claims 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitchell et al. Mitchell et al. disclose an article of furniture 10 with a top surface 12, a receptacle unit 30, with a top 50 and a receptacle 48, and a housing 50 mounted on the underside of furniture 10.

Claim Rejections - 35 USC § 103

9. Claims 3-5,7,8,10-13,15,17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byrne 4,747,788. Byrne discloses a gap space 166, to permit transmission lines to extend through and means 168 for covering the gap space. Byrne does not show each sidewall having a receptacle. However, on page 9 lines 54-57 Byrne discloses that the receptacle box 152 (which includes the walls) could be double sided to accommodate multiple receptacles. It would have been obvious to modify the receptacle of Byrne to include receptacles on multiple sidewalls to supply multiple outlet capacity. Also, since applicant has not disclosed that having a different sidewall of the receptacle unit facing a different side of the article of furniture as a critical feature, the variations are considered to be obvious.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. J.L. Myers 3,433,886

Conclusion

Response to Arguments

11. In response to applicant's argument that Byrne does not disclose a substantially planar retractable receptacle 150, the word "substantially" renders the claim(s) indefinite.

12. Applicant's arguments filed March 12, 1999 have been fully considered but they are not persuasive. In response to applicant's argument that Byrne does not disclose a substantially planar retractable receptacle 150, the word "substantially" renders the claim(s) indefinite.

13. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
